THERMAL SEAL

Thermal and Moisture Protection Sealant

ACRYLIC LATEX CAULK With SILICONE

45 Year Durability

Paintable

Mildew Resistant

White

Priced to Compete!

THERMAL SEAL:

Acrylic Latex Caulk with Silicone provides a long lasting thermal and moisture protective seal between most building materials including wood, masonry, concrete, brick, drywall, metal and glass.

THERMAL SEAL is designed to achieve 45 year durability, and can be used for both interior and exterior applications.

PAINTABILITY:

Allow a minimum of 2 hours cure time before painting with latex or oil base paint. Extra dry time is recommended during periods of high humidity and/or cool temperatures.

THERMAL SEAL meets or exceeds ASTM C – 834 specifications.
